

SAFEGUARDING AI SOLUTIONS

Reliable power protection for AI applications

According to the International Energy Association, electricity demand from data centers, artificial intelligence (AI), and cryptocurrency will double by 2026. This means power protection will be critical to help meet the increased demands and protect against power surges and outages.

CyberPower offers a full array of power protection solutions to help deliver your customers peace-of-mind, with single and 3-phase UPS systems and power distribution units.

GUARDS EQUIPMENT

Defend against surges and provide graceful shutdown during extended outages

PROTECTS DATA

Safeguard vital network data from loss or corruption with uninterrupted, seamless power

LIMITS DOWNTIME

Employees stay productive and satisfied

PROVIDES INSURANCE

The cost of power protection often pays for itself after one incident

POWERING THE DATA CENTER

Trust CyberPower to provide power protection to ensure uninterrupted power to mission-critical servers, sensors, controllers, and IT infrastructure in data centers.

3-PHASE PDU

Provide expanded power distributions to energy hungry server racks. Select models provide outlet-level power monitoring in real time, along with individual outlet control for remote reboots, load shedding, controlled power-cycling, and more.

RACK ENCLOSURE

With solutions for security, shelving, air flow, and cable management, CyberPower rack enclosures and accessories provide a solid foundation and critical protection for all computing and networking applications.

SINGLE-PHASE POWER PROTECTION:

- Servers
- Storage
- Telecom
- Networking
- Security

RACK MOUNT UPS

CyberPower offers a wide range of rackmount UPS systems with line-interactive and double-conversion topologies to protect your sensitive IT equipment.

PDU

PDU's manage and distribute the power via multiple outlets to the servers and networking equipment. CyberPower offers a wide array of PDU's for every application.

3-PHASE UPS

With a customizable, modular design can be arranged into multiple configurations and high-density power modules pack more power into less space to meet the demands of your business.

3-PHASE POWER PROTECTION:

- Servers
- Storage
- Telecom
- Networking
- Security
