

SEE, HEAR, HEAL

JLab's AV Solutions for Telehealth Excellence

ADDRESSING TODAY'S HEALTHCARE CHALLENGES

In the wake of the COVID-19 pandemic, the healthcare industry experienced a seismic shift toward telehealth, with the demand for remote consultations surging by over 154% in the early months. Post-pandemic, telehealth remains an essential component of modern healthcare, with over 40% of healthcare visits in the U.S. now occurring remotely. As this trend continues, the need for clear, reliable audiovisual connectivity has never been more critical. Quality sound and video ensure that healthcare providers can deliver precise diagnoses and maintain strong patient relationships, no matter the distance.

TAKE YOUR HEALTHCARE ORGANIZATION TO THE NEXT LEVEL

Prevention & Wellness

Provide additional support to patients in between clinic visits

Personalized Patient Experiences

Strengthen patient experiences and improve care outcomes

Urgent/Specialty Care

Increase access to care and onboard new patients

JLab, a leader in affordable, high-performance audiovisual technology, is committed to empowering healthcare facilities with solutions that enhance accessibility and communication. From premium headsets to crystal-clear webcams, JLab offers healthcare professionals the tools they need to provide top-tier care remotely—breaking down barriers and ensuring that every patient is heard, seen, and understood.

EPIC WORK ANC WIRELESS ON-EAR HEADSET

KEY BENEFITS OF JLAB WORK HEADPHONES

QUICK MUTE ROTATING MIC

The flip-to-mute rotating boom mic ensures clear communications during calls. You can easily mute the microphone by flipping it up when you don't want to be heard. The rotating design allows you to position the mic optimally for better voice pickup.

HYBRID ACTIVE NOISE CANCELLATION (ANC)

Indulge in up to 30 dB of noise cancellation while retaining awareness of your surroundings, ensuring an immersive audio experience.

CRYSTAL-CLEAR CALLS

Experience exceptional call clarity with the adaptive noise-canceling mic, while the rotating ENC mic allows for quick mute and 'Hear Yourself' mode, facilitating seamless communication in any environment.
