

CyberPower®

MONITOR POWER ANYTIME, ANYWHERE

Power monitoring via PowerPanel Cloud Pro

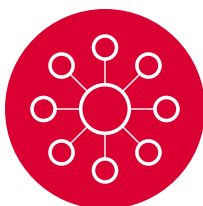

**POWERPANEL CLOUD
PRO**

Ideal for decentralized service providers, small to medium businesses, and corporate enterprises, PowerPanel® Cloud Pro makes it easy to monitor an unlimited number of UPS systems anytime, anywhere.

CLOUD MONITORING

Easily monitor power anytime, anywhere from the web browser. Remotely troubleshoot and receive power event notifications in real time.

GROUPING

Groups or subgroups can be monitored separately in a hierarchical view or by permission levels across different locations locally, nationally, or globally.

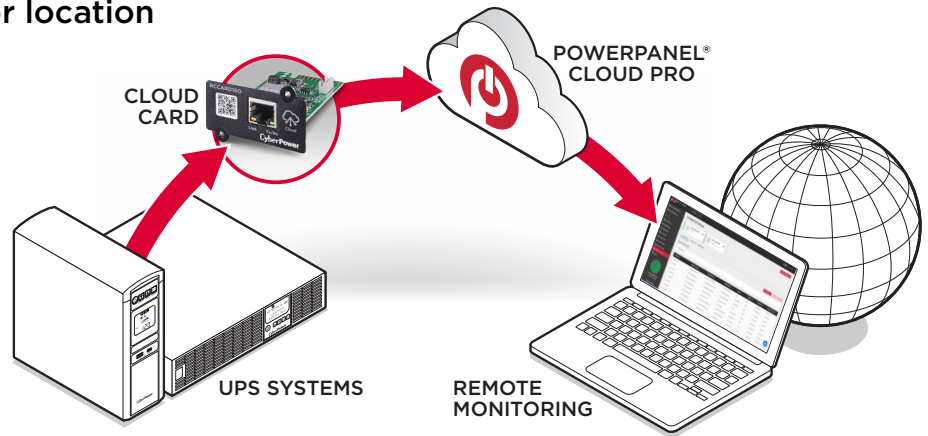

SINGLE SIGN-ON

Enjoy the ease and convenience of Single Sign-on functionality, which improves security and saves time.

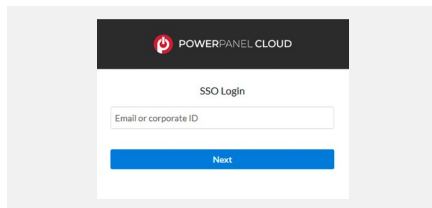

UNLIMITED POWER MONITORING

Monitor by segment, client, or location

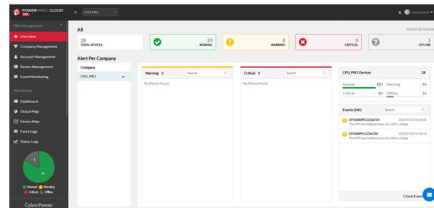

Ideal for IT organizations needing to monitor devices remotely, PowerPanel Cloud Pro allows for real-time remote monitoring of UPS systems in multiple locations on the same platform.

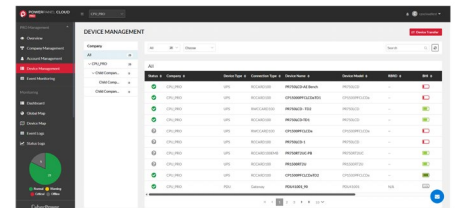

INTUITIVE, EASY-TO-USE DASHBOARD

Convenient Single Sign-on process

Easy-to-use, intuitive dashboard

Manage UPS systems by segment, client, or location

For businesses, it provides an easy and affordable remote monitoring option. Notifications are sent directly so issues can be addressed immediately. It's the perfect solution for monitoring UPS systems at many locations.

With a monthly billing cycle, you have the flexibility to add or remove UPS units as needed. Billing is based on number of devices connected each month and ensures you only pay for what you use without any long-term contracts.

The intuitive dashboard used color-coded indicators to provide UPS status, power conditions, and issue alerts at a glance. Event logs provide key insights to proactively manage your power.
