

CyberPower®

SAFE & SECURED

Keep security systems and A/V equipment up and running

Keep your peace of mind and rely on CyberPower's PFC Sinewave UPS systems to keep security systems and A/V equipment up and running during power outages. These units provide battery backup, surge protection, and EMI/RFI noise filtering for sensitive electronics requiring an active PFC power source.

They feature a user-friendly, multifunction color LCD Control Panel to quickly confirm the UPS status and alerts at-a-glance. PowerPanel software provides advanced control of the UPS, including scheduled shutdown/reboot and email notifications. They are backed by a three-year warranty and a connected equipment guarantee.
